

**Provides this certificate of sanitation for
Seatides Combined School
27 Dolphin Ave**

This serves to certify that the property at the above referenced location has been sanitised using the below two products:

1. The active ingredient in our Thermal Application chemical is a broad-spectrum disinfectant, Didecyl Dimethyl Ammonium Chloride, which is known to achieve a >99.999 killing efficacy against all viable bacteria/pathogens (including COVID-19) in accordance with SANS 51276:2009.

This chemical is registered with the National Regulator for Compulsory Specifications (NRCS).

Reg No: Act5GNR529/281852/040/1086.

The chemical we use also has excellent biodegradability and consequently, low environmental impact. Because it is truly non-corrosive and does not oxidise, It also preserves the premises and equipment. It is not pH-dependant and works at a wide range of temperatures.

2. The chemical we use in our Cold Mist application is an antibacterial hand and surface disinfectant/sanitiser which contains 70% alcohol. It is fully biodegradable in accordance with ISO 9439. This product is also not a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200
